

Epson and 64 bit Windows

Microsoft has released Windows XP Professional x64 Edition operating system. We have developed drivers to use within this system.

Windows XP Professional x64 Edition will run on the AMD Athlon 64, AMD Opteron, Intel Xeon with EM64T and Intel Pentium 4 with EM64T.

EPSON is committed to ongoing support for the Windows x64 platform and will continue to develop Applications and Device Drivers across our range of digital imaging products. Note: Existing 32 bit device drivers will not work correctly with x64 Windows.

Some products are supported using drivers supplied with the Operating System or In-box drivers. Other products will require specially designed 64 bit drivers which will be made available for download from the Epson support website.

Please see below information on 64 bit Printer and Scanner Drivers already released. If your product is not currently listed regularly check our support website for further status updates.
